a moderately short white male who was dressed casually in dark clothing and had very long, dark hair. He was open

about his gender issues, in terms of his identification of being a lesbian-transsexual, reflecting his sense of being a woman inside of a man's body who prefers sexual relations with women. He established good rapport and was fully cooperative with the assessment. Mr. Saunders displayed a responsive, rather dramatic range of affect which was incongruent with his dysphoric mood. His speech was marked by extreme logorrhea and a stylized

...  
Consistent with clinical impressions, Mr. Saunders performed extremely well on the Shipley Institute of Living Scale. He obtained a perfect score on measures of abstract reasoning and vocabulary, and it is likely that his intellectual functioning falls in the Very Superior range.

Thaddeus Povinelli PhD Prosecution expert witness 6/14/97

Diagnostic Impression DSM-IV: Having taken into consideration the aforesaid mental status examination, diagnostic tests and available clinical history, it is felt the diagnosis should be rendered of:

Axis I - 296.34 - Major Depressive Disorder Recurrent With  
Psychotic Features - Mood Congruent

304.30 - Cannabis Dependence

Axis III - - No Diagnosis

Axis IV - - Problems in the legal situation.

Axis V - GAF Scale - 45 - Some impairments in both social relationships and occupational functioning.

Prognosis: With Treatment - Fair  
Without Treatment - Poor

<b>5. CURRENT DIAGNOSES:</b> (NOTE: If this represents a CHANGE IN ANY DIAGNOSES, a MED-15 MUST BE COMPLETED.)	
Axis I:	296.4 Bipolar I Disorder Most Recent Episode Hypomanic 305. History of Cannabis Abuse
Axis II:	301.9 Personality Disorder NOS
Axis III:	History of hypertension, left should pain
Axis IV:	Interaction with legal system
Axis V:	Current GAF 60-70 Past Year GAF 50-60
<b>6. TREATMENT RECOMMENDATIONS</b> (Based on the above Evaluation, state current treatment recommendations.)	
Patient will be maintained on Risperdal Consta 25mg IM. Discussed with the patient that he understands that his Risperdal Consta is going to be very expensive but a trial will be made from the drug company if he can some kind of a program to provide him with less cost, but he is willing to change the medication to po if he cannot afford this Risperdal Consta medication. He is presently going to the SOCR Group Home every two weeks. He is presently on pass to the home and visiting EPC. He has presently been cleared by the Forensic Committee at the hospital and is awaiting answer from the Forensic Committee in Albany. Patient is presently not having any side effects from the medication and is presently waiting for the placement in the community.
